Hindi
English

PROFILE

I am a Full Stack Developer, working with React, Next.js, TypeScript, Node.js, and JavaScript. I create scalable, secure, and well-structured websites while maintaining clean and maintainable code. With a strong focus on cybersecurity practices, I ensure the safety and reliability of web applications.

WORK EXPERIENCE

Info Security Analyst

Quick Heal

Sep 2024 - Present

- Research emerging cybersecurity trends and evolving threats to stay informed and proactive.
- Work closely with Quick Heal Academy to manage and oversee the delivery of cybersecurity programs.
- Contribute to the revamp and enhancement of the Quick Heal Academy website for better functionality and user experience.
- Manage and maintain the Learning Management System (LMS) for seamless course delivery and user engagement.
- Curate and design courses, integrating the latest technologies and best practices in cybersecurity.
- Develop practical exercises to help visualize and explain complex cybersecurity concepts effectively.

Freelance Intern

Freelance

Sep 2023 - March 2024

- Gained hands-on experience with web technologies such as React, Next.js, TypeScript, MongoDB, Node.js, and Redux.
- Developed full-stack web applications, working on both frontend and backend to create scalable, well-structured websites.
- Focused on secure coding practices and maintained large codebases for efficient project management.
- Successfully completed over five projects independently, including admin panels, landing pages, and a railway application.
- Acquired functional knowledge in CI/CD processes and handled website deployments to production.
- Addressed and resolved bugs and errors in deployed applications, ensuring smooth functionality.
- Gained practical experience in creating database schemas, writing documentation, and managing application workflows.

PROJECTS

- Developed a range of client-ready projects including e-commerce websites, mobile app landing pages, and e-learning platforms.
- Created WordPress websites and full-stack applications, including employer profile sites and admin panels for news applications.
- Built several clone websites to strengthen development skills and gain practical experience in full-stack development.
- Worked on Firebase-based applications, implementing Firebase Auth for user authentication and managing file uploads and storage.
